Introduction

Created to show the rebirth and rise of the original meme and community projects such as Shiba, Floki, Akita, etc. Our goal is to attract like-minded investors who will work together for the overall success of the project and exemplify the true meaning of community-driven.

Zakujira Is a multiple-utility token on the Ethereum block chain. DEX SWAP, COIN LISTING PLATFORM, TRADING PLATFORM, WALLET, and DEBIT CARD will be the main utilities. Our goal is to have a balanced ecosystem as a result of these projects.

Mission

Through competent blockchain development, community management, imaginative asset design, effective marketing, and entertaining websites, our objectives is to supply the alternative market with cryptocurrency tokens of the greatest quality and security.

Zakujira aims to efficiently build an empire of whales by holding this token.

User Benefits

The features of Zakujira are based on the ideology of giving users the maximum benefits.

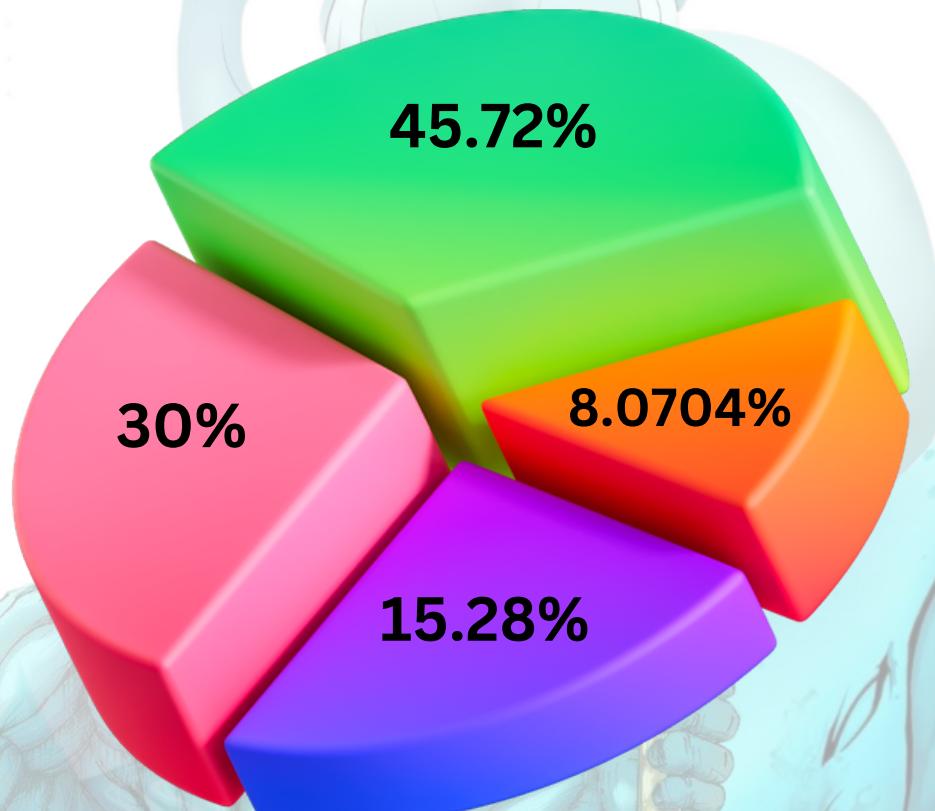

Safe and secure

Safe and secure Liquidity will be locked for as long as the community requires it and will be extended on a continuous basis based on requests and votes from all holders.

Token Details

- ✓ **Token Name:** ZAKUJIRA
- ✓ **Symbol:** KUJIRA
- ✓ **Network:** ETHEREUM BLOCKCHAIN
- ✓ **Total Supply:** 1,000,000,000 (One Billion)
- ✓ **Decimals:** 9
- ✓ **Contract address:** 0xd8CE941666e429bbd969c1Af11f474b505c69BC5
- ✓ **Contract Owner:** 0x4103fc825c946C14194000419E514e30600fE9d1

Tokenomics

● Liquidity on uniswap

● Initial Burn

● Manual burning (*burning event*)

● CEX Listing

Ecosystem

Zakujira is the governance token of ***zakujira*** ecosystem. Governance tokens are tokens created by developers to empower token holders to influence the destiny of a system. Governance token holders can influence project choices such as submitting or voting on new feature requests and even modifying the governance structure itself.

Thus, **Zakujira** is seeking to build an ecosystem around its token to pay awards to businesses and individuals that use ***zakujira*** tokens as digital assets. If you want to diversify your portfolio, the ***zakujira*** ecosystem is ideal because it provides a variety of tokens in which to invest. Essentially, the only way to grow any initiative that is founded on firm ground is through an engaged and active community. As a result, we require robust community support to develop the ecosystem.

Utilities

Utilities are one of the project's primary goals; the Zakujira team will create utilities that will make the token useful. All this development will use the Zakujira token as its main use for a better token ecosystem.

Dex Swap

DEX stands for a Decentralized exchange. Zakujira will release a dex swap so users can trade and swap easily and safely. Questions? Is this swap the same as what's currently on the market? The answer is no, because our zakujira swap differs from other dex swaps on the market; it has many special features that others do not have, so we decided not to make it public until we released it to avoid copying these features. For them to enjoy these features, the users will need to hold a certain amount of zakujira tokens. But holders and non-holders can use it. The distinction is in the special features of swap.

Coin Listing Platform

Coin listing platform is a platform where coin and token developers and project owners can now list and promote their token. This platform can help our crypto investors do their own research and easily decide what coin or token they will invest in, so they can invest with minimal risk. Like our swap, this platform has a lot of special features that users can enjoy.

Trading Platform (*charting tools*)

This will help the users create one-of-a-kind trading methods, forecast market moves of zakujira or any other coin/token, and build better trading methods.

Defi Wallet

DeFi wallets are designed specifically for holding Decentralized Finance (DeFi) tokens, also known as cryptocurrencies. If you're interested in getting into cryptocurrency, or if you're just looking for a better way to store your tokens, then you should consider using a DeFi wallet.

Zakujira wallet differs from other DEFI wallets on the market, particularly in terms of security features, because we will add numerous security functions to it, similar to our swap.

Debit Card

Debit cards act like prepaid debit cards that can be loaded with cryptocurrency to make online and in-store purchases from merchants that don't accept cryptocurrencies.
